## gcLink Golf Car USB Charger - Dual Port

The gcLink golf car USB Charger is compatible with all makes, models, and years of electric golf cars and features easy installation. With support for both 48V and 36V DC battery systems, a separate DC-to-DC converter is NOT required, which is the case with 12V USB chargers. With encapsulated electronics to protect against moisture, corrosion, shock, and vibration, the gcLink USB Charger is designed for the abuse of being used in a golf car.

The gcLink golf car USB Charger provides dual USB ports for simultaneous charging of two (2) devices, is high output with 3A shared between both ports, and is compatible with most smart phones and tablets.

- + Compatible with all makes, models, and years of electric golf cars
- + 48V, 36V, and 24V DC battery systems
- + Two (2) USB ports for simultaneous charging
- + High output charger with 3A shared between both ports
- + Compatible with most smart phones and tablets
- + Auto Detect technology provides full rate charging compatibility with most devices
- + Encapsulated electronics protected from moisture, corrosion, shock, and vibration
- + Easy installation
- + Made in the USA

## Specifications

### DC Input

Battery Systems	48V, 36V, 24V
Operating Voltage Range	19-72V
Protection	Current limit (fused, non-replaceable), reverse polarity, short circuit
Cable	8 ft, battery positive marked with stripes

### DC Output

USB	2 Dedicated Charging Ports (DCPs)
Connectors	Standard-A receptacles, gold-plated contacts
Voltage	5V $\pm$ 5%
Current	3A, shared; < 30V input: 2.5A, shared

### Environmental & Regulatory

Operating Temperature	-20 °C to 50 °C (-4 °F to 122 °F)
Storage Temperature	-40 °C to 85 °C (-40 °F to 185 °F)
FCC Part 15, Class A	Compliant
