High-Tech Meets The Heartland

Know that your batteries are charged and cared for.

BLUETOOTH COMMUNICATION and cloud connectivity give you the information you need quickly and conveniently. Our **CHARGERCONNECT™ APP** is free and compatible with Apple and Android devices. Connect in seconds and see that your batteries are ready for a full day of work. Check history records to be sure batteries are regularly and properly charged.

Less *weight*. Less *space*. More *awesome*.

Compact and lightweight charging solution. Summit Series II offers a small physical footprint and is easily carried using a convenient optional handle. It can also be installed onboard a forklift like a walkie pallet truck.

Smart maintenance and storage.

Charger monitors battery voltage and time elapsed to ensure your batteries stay properly charged and cared for while a forklift is in storage or not being used regularly.

Universal plug-in chargers.

Able to be used with standard 120Vac / 15A outlets and featuring a 100-240Vac range, making Summit Series II a plug-in charger with quick and simple installation.

Tough. *Really* tough.

These chargers are sealed from water and dust and are built without fans. They have a wide operating temperature range for use in cold storage or non-temperature controlled facilities. This isn't your average charger.

Easy and *flexible*.

Auto-voltage sensing models provide the ease of using one charger with forklifts of different voltages. The Summit Series II terminal block also makes changing the DC cordset a breeze.

A whole new *world* of charging.

Get the charging performance your equipment demands with industry-leading features and intelligence. Our proprietary Progressive DV/DT™ charge algorithm ensures precisely charged batteries every time.
